**ABSTRACT**

Ahara (food) is the prime need for the sustaining of life. Ayurveda explained about Trividha Upasthambha (sub-pillars of body) and Ahara (food) is one of the important pillars for healthy living. For healthy living Ayurveda emphasizes on consuming right kind of diet which provide health and nutrition. The diet which disturbs the balance among the body elements is called Viruddha Ahara (Incompatible diet). Even incompatible diet should be considered similar to Gara Visha (Artificial poison). Viruddha (Incompatible diet) means substances which when consumed cause for aggravations of Doshas but do not expel them out of the body and bring about abnormalities in Dhatu (tissues of the body). The incompatible diet could be considered similar to poison and artificial poisoning if taken simultaneously and continuously. Due to western lifestyle there is extensive exposure to toxins. **INTRODUCTION**

Ahara (food) Nidra (sleep) and Brahmacharya (controlled sex) are three basic pillars of Shareera (body). Ahara (food) is the prime need for sustaining of life. It has its own importance in concept of Trividha Upasthambha (sub-pillars of body). Without Ahara (food), life would not continue for very long, so it is considered under Upasthambha (sub-pillars of body). For sustainment of life, for all living beings Ahara (food) is very much essential. Ahara (food) is responsible for both Arogya (health) and Vyadhi (diseases). According Vidhi (Dietary regimen) if Hita Ahara (compatible diet) is consumed it provides Bala (promotion of strength), Varna (complexion) and Indriyaprasadna (nourishment of the senses). Ahara (food) does not benefit the body, if it is not prepared as per the Asta Ahara Vidhi Visheshayatana (factors for wholesomeness). The substances which when consumed cause for aggravations of Doshas but do not expel them out of the body and bring about abnormalities in the Rasa etc. Dhatu (tissues of the body) give rise to diseases are considered to be incompatible food and named as Viruddha Aahara (incompatible diet).

The recommended therapy for diseases caused by incompatible food is Shodhana Chikitsa (Eliminative therapy), Shamana Chikitsa (Palliative therapy) and avoidance of incompatible of incompatible food. Charaka, who mentioned that incompatible diet, is one of the causes for spreading the morbid humours from the alimentary tract to the peripheral systems and causes diseases.
