Method of Preparation

Ashtanga Hrudaya has not mentioned its method of preparation. Whereas, *Prayoga Samuchaya* clearly explains it. All the drugs mentioned in the table should be taken in equal quantity and made into fine powder and by triturating with water, tablets are prepared which should be dried and stored.^[2] Presently this *Yoga* is available in the form of *Kashaya*. Since dosage is not mentioned in any textbooks Standard dosage of *Kashaya* i.e. 2 Pala (app. 96ml) is taken internally in empty stomach is currently practised.
